

# sanitationstation

Give your customers peace of mind by providing them with a sanitation station.

Help protect your customers from the spread of germs and bacteria.

Providing a clean facility is especially important with today's awareness of germs, viruses and bacteria. Sanitation stations are designed to provide your customers with easy and convenient access to CitrusWirx disinfectant wipes.

Stations are manufactured with durable materials ensuring superior strength and fixture life span. Freestanding stations are available with the option of a custom sign that can incorporate your logos and designs. The painted steel stand has a sturdy base which is designed to provide freestanding stations with sufficient stability while still allowing it to be mobile. A bin can also be included for discarded wipes and other waste. Freestanding stations freight in two packages and can be assembled in minutes.

The dispenser has a clear dome that allows you to know when to replace a roll. It can be wall mounted or incorporated into the freestanding station.

CitrusWirx is an alcohol free disinfecting wipe developed to sanitise equipment, and various surfaces. CitrusWirx wipes use EPA registered disinfectants which are highly effective against influenzas and viruses. The wipes are soft and durable to prevent irritation and have a pleasant citrus aroma. Our wipes are also environmentally friendly and are 100% biodegradable.

Easy refill CitrusWirx rolls consist of 360 wipes. They are sold separately or in a carton of 12 rolls.

We are committed to providing your customers with the ability to enjoy a clean and safe facility.
